Quick Start Guide

This Quick Start Guide is designed to help you get started using your new toothbrush. It does not contain essential product safety information or detailed user instructions.

Please refer to the Owner’s Manual for more comprehensive information.

**Charging Your Toothbrush**

For best results, fully charge the toothbrush before using. This may take up to 24 hours.

**Select Operating Mode**

Select your preferred cleaning mode:
- Normal
- Sensitive
- Massage
Brushing Technique
After rinsing and applying toothpaste, hold the toothbrush at a 45 degree angle, then turn on the power. Allow the toothbrush to clean your teeth by applying light pressure and gently moving in a back and forth motion.

Built-in Timer
The built-in timer will keep the toothbrush on for 2 minutes, pausing every 30 seconds which indicates that it’s time to brush the next section.

Using the UV Sanitizer
To sanitize your brush head after use, rinse and shake dry, place in the sanitizer tray facing the UV light and close the lid. The sanitizer automatically runs for 7 minutes when closed.
IMPORTANT SAFEGUARDS

READ ALL INSTRUCTIONS & SAFEGUARDS BEFORE USING THE APPLIANCE

The InteliSonic has been carefully designed to offer you a new and unique brushing experience that is both safe and effective. However, when using electrical products, especially when children are present, basic safety precautions should always be followed, including the following:

DANGERS

WATER
To reduce risk of burns, electrocution, fire, or injury to persons:

1. Do not use while bathing.
2. Do not place or store the charger base with UV sanitizer where it can fall or be pulled into a bathtub, sink, or toilet.
3. Do not immerse the charger base with UV sanitizer into water or flush with water or other liquid.
4. Do not reach for a product that has fallen into water. Unplug immediately.
5. Unplug charger base with UV sanitizer before cleaning and assure that it is dry before plugging into an electrical outlet.

VOLTAGE
To reduce risk of burns, electrocution, fire, or injury to persons:

1. Do not plug the charger base with UV sanitizer into an outlet with a voltage other than specified on the bottom of the charger.
2. This product is designed to operate within a range of 100–120 volts.
3. Voltage converters do not guarantee compatibility.
4. Do not force the plug into an outlet.
5. If the plug does not fit easily into the outlet, discontinue use.

WARNINGS
To reduce risk of burns, electrocution, fire, or injury to persons:

1. This product is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the product by an adult responsible for their safety.
2. Children should be supervised to ensure they do not play with the product.
3. Use the toothbrush only for its intended use as described in this manual. This product is designed to clean your teeth, gums, and tongue only. Only use attachments that are recommended by the manufacturer.

4. The toothbrush is a personal care product and is not intended for use on multiple patients in a dental office or institution.

5. If your toothpaste includes peroxide, baking soda or other bicarbonate (common in whitening toothpastes), thoroughly clean your brush head and handle to avoid plastic cracking.

6. Never operate this product if it has a damaged cord, plug or charger base with UV sanitizer. Do not use this product if it is not working properly, if it has been dropped or damaged, or dropped into water. Immediately discontinue use if the product appears damaged in any way.

7. Keep the toothbrush, charger base and power cord away from heated surfaces.

8. If you experience discomfort or pain in your mouth, discontinue use of this product and contact a dentist.

9. Do not attempt to remove the battery.

10. Do not clean the toothbrush in the dishwasher.

11. Discontinue use of the charger base with UV sanitizer if the UV light bulb remains on when the door is open. UV light can be harmful to human eyes and skin. Keep the charger base with UV sanitizer out of the reach of children at all times.

12. The UV light bulb is hot during and immediately after the sanitizing cycle. Do not touch the UV light bulb when it is hot.

13. Do not insert brush heads or operate the UV sanitizer without the UV sanitizer drip tray firmly in place.

MEDICAL WARNINGS

1. If you have had oral surgery or gum surgery within the past 2 months, consult your dental professional before using this product.

2. Consult your dental professional if you have excessive bleeding after using this product or bleeding continues after 1 week of use.

3. Consult your physician or implant device manufacturer prior to using this product if you have questions concerning the combined use of this product with a pacemaker or other implanted devices.

4. Consult your physician prior to using the toothbrush if you have medical concerns.

5. The toothbrush has been tested and is compliant with safety standards for electromagnetic devices.
SAVE THESE INSTRUCTIONS
Read the user manual carefully before using the InteliSonic.

Configuration

- Brush head travel cap (2)
- Brush head (2)
- UV sanitizer drip tray
- UV sanitizer lid
- UV sanitizer compartment
- Brush handle
- On/Off button
- Mode selection button
- Mode indicator
- Charge indicator
- Brush charger base
- UV light bulb
- Power cord
- Travel case
- Charger base with UV sanitizer
Getting Started

Charging the Toothbrush

1. Place the toothbrush handle on the charger base and plug into the electrical outlet.
2. The charge indicator light will turn green, indicating the unit is charging.
3. After the battery is fully charged, all 3 sections of the charge indicator light will turn solid green, indicating the toothbrush is fully charged.

4. When fully charged, the toothbrush can be used at least 20 pre-timed brush cycles, or approximately 10 days, if brushing twice daily.
5. The toothbrush must be charged for 24 hours, if:
   a. this is the first time using the toothbrush.
   b. the toothbrush has not been used for at least 2 months.
   c. the charge is drained from normal use.

Note: While the toothbrush is charging, it will be inoperable.

Note: To keep the battery fully charged at all times, you may keep your toothbrush on the charger when not in use. It takes approximately 24 hours to fully charge the battery.
Using The Toothbrush

1. Attach a brush head to the toothbrush handle.
2. There will be a small space between the brush head and brush handle. This allows for the vibration of the brush head when in use.
3. Using the mode selection button, select which mode you prefer for your brushing session.
   - Normal: Completely cleans your teeth and gums.
   - Sensitive: Gently cleans your tongue and any other sensitive areas.
   - Massage: Pulsates for gentle gum stimulation.

Note: If you alter the mode during the brush cycle, the 2 minute brush cycle will reset.

4. Wet the toothbrush bristles and place a small amount of toothpaste on the brush.
5. Place the bristles against the teeth at a 45-degree angle towards the gum line to ensure the bristles are in close contact with the space between teeth and gums.
6. Press the power button to turn on the toothbrush.
7. Apply light pressure and gently move the brush head slowly across the teeth in a small back and forth motion. Continue this motion throughout the brushing cycle.

Brushing Time

1. In order to maximize cleaning effectiveness, divide your mouth into 4 sections. Start with Section 1 and brush each section for 30 seconds. The brushing action will pause between each 30 second interval, indicating when to move on to the next section. The toothbrush will automatically stop after 2 minutes of use.

Note: If you change the cleaning mode during the brushing cycle, the 2 minute brushing timer will reset and start over.
2. After completing the brushing cycle, you can spend additional time brushing the chewing surfaces of your teeth and areas where staining occurs. You may also brush your tongue, with the toothbrush turned on or off, as per your personal preference or dentist recommendation.

Note: The InteliSonic is also safe to use on:
• Dental restorations (fillings, crowns, veneers)
• Braces (brush heads will wear out sooner)

Additional Oral Care Needs

Periodontal pockets: Spend extra time working the bristles into the pockets where plaque collects below the gumline. Ask your dental professional for help with identifying these areas.

Sanitizing the Brush Head(s)

1. Place the brush head bristles under running water and rinse after each use.
2. Gently shake the toothbrush to remove any excess water after cleaning.
3. Lift and open the UV sanitizer lid.
4. Place the brush head(s) on the peg(s) located in the UV sanitizer drip tray with the bristles directly facing the UV light bulb. Remove the travel cap before proceeding with UV sanitizing. DO NOT PLACE THE PROTECTIVE TRAVEL CAP ON THE BRUSH HEAD DURING UV SANITIZING.
5. Make sure the charger base with UV sanitizer is plugged into a working outlet.
6. Close the UV sanitizer lid to activate the UV sanitizing process.
   a. The sanitizer lid will glow with a slight blue hue indicating the UV light bulb is lit and the sanitizing cycle has started. Please note that this glow may be difficult to view in well lit areas.
   b. When the sanitizing cycle is complete, the sanitizer will automatically turn off and the lid will no longer glow.
7. When using the UV sanitizer:
   a. Only clean IntelliSonic heads in the sanitizer.
   b. Do not insert brush heads or operate the UV sanitizer without the drip tray in place.
   c. The UV sanitizer will only work when the lid is closed.
   d. The UV sanitizer will run for 7 minutes and shut off automatically.
   e. The UV sanitizer will run automatically every time the lid is closed.
Operation Modes
1. There are 3 operation modes: normal, sensitive and massage.
2. Use the triangular mode selection button to select your preferred operation mode. Your mode selection will be indicated by a green light.
   a. Normal: Completely cleans your teeth and gums.
   b. Sensitive: Gently cleans your tongue and any other sensitive areas.
   c. Massage: Pulsates for gentle gum stimulation.

Note: The high-speed sonic toothbrush is different from traditional rotary power toothbrushes. Some people may experience a slight tickling sensation from its high speed vibration. After a few uses of the toothbrush, this sensation will diminish.

Maintenance

Cleaning the Power Plug
1. Clean the power plug regularly to ensure it remains in good working order. The accumulation of dust or dirt on the power plug can cause an electric shock or reduce the insulation effect, causing the system to overheat.

Cleaning the Brush Head(s)
1. Rinse the brush head and bristles after each use.
2. Do not use water with a temperature higher than 100 degrees Fahrenheit.

Cleaning the Handle
1. Remove the brush head.
2. Wipe all surface areas with a damp cloth and place the handle back into the charger or handle base. Do not submerge the handle in water.
3. Do not clean in the dishwasher.

Cleaning the Charger Base
1. Remove the power plug from the electrical outlet before cleaning the charger base and UV sanitizer.
2. Using a soft cloth, wipe dirt or debris from the charger base and UV sanitizer exterior surfaces.
3. Clean the plug base with a dry cloth to remove any dust or dirt every 3 months.
Cleaning the Sanitizer Station

Note: Do not clean the UV sanitizer if the UV light bulb is hot.

1. Unplug the charger base with UV sanitizer.
2. Remove the UV sanitizing drip tray by gently grasping the UV light bulb guard and lifting up. Once the drip tray has been safely removed, rinse and wipe it clean with a damp cloth.

Note: Do not handle exposed UV light bulb.

3. Reinsert the UV sanitizing drip tray by aligning the tray over the UV light bulb so that the bulb cover will slide over the top of the bulb, then gently lower the tray into place.

Note: For optimal performance, clean your UV sanitizer station weekly.

Cleaning the Travel Case

1. Rinse with water and use a mild soap if needed.
LIMITED WARRANTY

DentistRx, LLC will provide a Limited Warranty for this product for up to 2 years from the purchase date. Original sales receipt with date of purchase is required for all Limited Warranty claims. For defects identified within the warranty period, the components or entire product will be replaced. In order to make a claim under the Limited Warranty, contact 1-877-71-SONIC (1-877-717-6642).

The Limited Warranty is void if the damage is caused by neglect, or improper use, such as using with the wrong electric current, voltage, and/or for commercial use.

If parts from other devices are inserted into the toothbrush, the Limited Warranty is no longer valid.

Limited Warranty Exclusions

The Limited Warranty does not cover:

1. Normal wear and tear including scratches, chips, abrasions, discoloration or fading.
2. Damage caused by abuse, neglect, misuse, alterations to the product or unauthorized repair of product.
4. UV light bulb.

IMPLIED WARRANTIES

Any implied warranties, including implied warranties of merchantability and fitness for a particular purpose, shall be limited to the duration of the express warranties set forth in the DentistRx, LLC warranty provision above. Some states do not allow limitation on how long an implied warranty lasts, so the above limitation may not apply to you.

LIMITATION OF REMEDIES

IN NO EVENT SHALL DENTISTRX, LLC OR ANY OF ITS AFFILIATED OR SUBSIDIARY COMPANIES BE LIABLE FOR ANY SPECIAL INCIDENTAL OR CONSEQUENTIAL DAMAGES BASED UPON BREACH OF LIMITED WARRANTY, BREACH OF CONTRACT, NEGLIGENCE, TORT OR ANY OTHER LEGAL THEORY. SUCH DAMAGES INCLUDE WITHOUT LIMITATION, LOSS OF SAVINGS OR REVENUE; LOSS OF PROFIT; LOSS OF USE; THE CLAIMS OF THE THIRD PARTIES INCLUDING, WITHOUT LIMITATION, DENTISTS AND DENTAL HYGIENISTS; AND COSTS OF ANY SUBSTITUTE EQUIPMENT OR SERVICES. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR EXCLUSION, SO THIS MAY NOT APPLY TO YOU.
Storage

If you are not going to use the product for an extended period of time, unplug it from the electrical outlet, clean it and store it in a cool and dry place away from direct sunlight. To maintain battery life when the InteliSonic is not used for long periods, it is suggested that you fully discharge and then recharge the battery every three months.

You can store brush heads on the pegs located inside the UV sanitizer.

Replacement

Brush Head
Replace InteliSonic brush heads every 3 months to achieve optimal results.

Replace only with InteliSonic brush heads.

UV Light Bulb
Replacement UV bulbs are available through DentistRx, LLC by calling 1-877-71-SONIC (1-877-717-6642).

Disposal
The InteliSonic was designed with the environment in mind by using a NiMH (Nickel Metal Hydride) battery. The battery inside the toothbrush cannot be replaced and does not need to be removed before disposal.

Do not throw away the appliance or the UV light bulb (bulb contains mercury) with the normal household waste at the end of its life, but hand it in at an official collection point for recycling. By doing this, you help to preserve the environment.

If you have any recycling questions, contact your local waste management office.
